

Lies

- Kant believes that there is a difference between a lie and a misleading truth
 - In both cases, there is a hope that the other person would be misled
 - But, in the case of the misleading truth, the motive is to stay true to the moral law (this makes it moral and respectable)

Contracts

- How do contracts bind?
 - It is based on consent → autonomy
 - It is based on mutual benefit → reciprocity
- Moral limits of contracts
 - Even if two people agree, the contract may not be fair
 - This implies that a contract must be based on consent
 - If there is reciprocity, there can be an obligation even without consent
 - This implies that a contract must be based on reciprocity
